

Develop something new together!

Your thesis

- Bachelor's, Master's or project work at LIDROTEC in Bochum

Are you looking for an exciting opportunity for your thesis? At LIDROTEC, an innovative start-up, you can find just that!

LIDROTEC has developed a new laser process to cut microchips. This technology can be used to produce new and powerful chips in smartphones, cars or medical devices. At the Bochum site, the team is continuously working to improve their industrial machines. Are you ready to be part of this future?

We always have exciting topics in the following areas:?

- **Optics & Lasers**
- **Engineering & Design**
- **Programming & Data Science**

Combinations of these fields are also possible. Together, we will adapt the exact focus of your work to your skills and the specific requirements. You can join our team at any time. Are you ready to develop something new with us?

What we offer:

- ✓ Support from experts who will accompany you during your work.
- ✓ Versatile and practice-oriented topics that have real industrial applications.
- ✓ An agile, young and friendly team.

What we expect:

- ✓ Personal initiative, reliability and strong teamwork skills.
- ✓ Strong communication skills.
- ✓ Basic technical understanding.

Does this sound interesting to you? Then don't hesitate to send us your application documents including your CV and your transcript of records as a .pdf file:
